HAMZA HASSAN

Full-Stack Developer

Rawalpindi, Pakistan | hamzahassanhh2608@gmail.com | +92-317-5446684 | GitHub: hmzahasan

OBJECTIVE

Aspiring Full-Stack Developer with a strong foundation in modern web development technologies and a passion for building responsive, user-friendly applications. Experienced in developing academic and personal projects involving component-based frontend architecture, backend REST APIs, and secure, database-driven systems. Seeking an opportunity to contribute frontend and backend development skills and continue growing as a Developer in a collaborative team environment.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design (Flexbox, Grid)

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Gemini API (AI Integration)

State & APIs: React Hooks (useState, useEffect, useContext), REST API Integration, Axios, Fetch API

Tools & Platforms: Git & GitHub, VS Code, Azure DevOps, Figma, Postman, MySQL Workbench, MS Office (Excel, Word, PowerPoint)

Programming Languages: JavaScript, TypeScript, C++, Python, Java, PHP

Databases: MongoDB, MySQL, Firebase Firestore, Relational Schema Design

Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, Clean Architecture, MVVM, REST APIs

EXPERIENCE

Software Development Intern

July 2025 – September 2025

NESCOM, Islamabad

- Developed an Azure DevOps extension for exporting work items and linked work items to Excel spreadsheets, improving project reporting efficiency
- Integrated Azure DevOps REST APIs to retrieve, process, and organize project management data in a structured format
- Participated in full-cycle development including frontend, backend, testing, and feature implementation
- Collaborated with the engineering team to understand requirements and deliver production-ready features on schedule

PROJECTS

AI Resume & Job Match Analyzer – MERN Stack, Gemini AI (Personal Project)

- Built a full-stack MERN application with complete JWT authentication where users submit a resume and a target job description
- Integrated Gemini AI to analyze both inputs and give a compatibility verdict for the job
- Generated a skill-gap analysis, personalized skill preparation plan, and interview questions for users who are not a match
- Added AI-powered resume generation that tailors the resume to the given job description

Banking Transaction System – Node.js, Express.js, MongoDB (Personal Project)

- Built a backend banking system with JWT-based authentication and secure money transfer between accounts
- Implemented a ledger-based system to accurately record and track every transaction
- Used idempotency keys to prevent duplicate transactions if a transfer fails or gets interrupted mid-process
- Designed REST APIs with Node.js, Express.js, and MongoDB for end-to-end transaction processing

Employee Management System – React.js (Personal Project)

- Built a frontend employee management system where an admin can create and assign tasks to employees
- Developed individual employee dashboards to view assigned tasks and update status (pending, completed, failed)
- Applied React Hooks and component-based architecture, with data persisted entirely in local storage

Movie Database Application – React.js (Personal Project)

- Built a movie browsing app that fetches live data from a public movie database API
- Designed a dashboard-style UI inspired by the movie database website for browsing movie details
- Implemented search and category-based browsing using React Hooks and reusable components

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Expected: January 2027

Iqra University, Islamabad | CGPA: 3.48 / 4.0

- Key Coursework: Data Structures, Database Systems, Web Development, App Development, OOP, Algorithms

ACHIEVEMENTS

- Internship at NESCOM: Successfully delivered an Azure DevOps extension used in real project management workflows
- Full-Stack Projects: Built functional frontend and backend applications, including a JWT-secured banking transaction system
- Strong Academic Record: Maintained a CGPA of 3.48/4.0 while working on industry-level projects

SOFT SKILLS

- Communication: Able to document and present technical concepts clearly to both technical and non-technical audiences
- Problem Solving: Consistently resolved complex bugs and design challenges in academic and personal projects
- Teamwork: Delivered 100% of assigned tasks in cross-functional academic project teams
- Adaptability & Time Management: Quickly picks up new tools and consistently meets deadlines without compromising quality

LANGUAGES

- Urdu: Native
- English: Professional Working Proficiency
